

Spend time with patients, not software

Designed by oncologists and world class engineers, OncoEMR® is an oncology-specific EHR built for community practices. With tools that relieve pressure through intuitive workflows and accessible data, OncoEMR® enhances your ability to do what you do best — deliver quality patient care.

“When we saw what OncoEMR could do, we were thrilled to discover how it thinks like an oncologist. Everything we needed was right at our fingertips.”

Fred Kudrik, MD
President, South Carolina Oncology Associates

A people-first philosophy

Implementation partners

EHR implementations are never easy, but we are here to support you through every step.

- Implementation specialists with deep IT, oncology and billing experience partner with you for a successful go-live
- Expert engineers ensure a smooth transition of your data

Dedicated support

We put the needs of your practice at the center of everything we do.

- Full service phone and email support offering, including 24/7 emergency assistance
- Access self-service resources and regularly scheduled trainings in Flatiron’s Help and Learning Center

Technology you can trust

An integrated cloud-based platform

The speed and flexibility of our cloud-based platform allows us to develop quickly and safely, while maintaining the highest product quality.

- Secure access 24/7, with no hardware costs or upgrade fees
- Supports CMS requirements. Is ONC Health IT 2015 Edition Cures Update certified, with [certified FHIR APIs](#)

Embedded clinical resources

Our oncology-specific design and integrated evidence-based resources facilitate information flow and reduce manual effort.

- AJCC staging calculators, NCCN® chemotherapy regimen templates, and embedded links to NCCN Guidelines® and UpToDate at the point of care
- Integrated State Prescription Drug Monitoring Programs for e-prescribing
